PROFILE

Proactive Go Backend Developer with strong experience in building scalable microservices, real-time data pipelines, and cloud-ready architectures. Skilled in designing and optimizing distributed systems with Go, PostgreSQL, Kafka, Redis, and Docker. Passionate about writing clean, maintainable code, solving complex problems, and delivering production-grade backend solutions for logistics, real estate, e-commerce, and SaaS platforms.

EXPERIENCE

Go Backend Developer – RRTM / Career.edu.uz

(Oct 2025 – Present)

https://career.edu.uz

- Developing and maintaining the backend of **career.edu.uz**, a career and jobs platform.
- Implemented backend logic for:
    - Job listings and applications

    - Internship (amaliyot) programs
    - Freelance opportunities
    - Online courses
- Built REST APIs and authentication mechanisms.
- Implemented role-based access control (RBAC).
- Integrated AI-based features for automation and recommendations.
- Worked closely with frontend and product teams on production features.

Go Backend Developer – LucidELD

(May 2025 – Sep 2025)

https://www.lucideld.com

- Worked on backend services for a fleet tracking and ELD platform.
- Implemented location tracking, trip management, and IFTA (fuel tax) modules.
- Built real-time GPS data ingestion pipelines using **Kafka + Cassandra**.
- Implemented trip lifecycle logic and weigh-station geofencing.
- Contributed to high-load backend services for telematics data.

Go Backend Developer – Nomakler

(May 2025 – Present)

https://nomakler.uz

- Developing backend services for a real estate platform.
- Built REST APIs using **Go + PostgreSQL**.
- Implemented authentication and user management features.
- Improved performance using **Redis caching** and **Dockerized deployments**.
- Collaborated with frontend developers during feature development.

Backend Intern – ULAB Amaliyot Dasturi

(Nov 2023 – May 2024)

- Participated in a backend internship program organized by **ULAB**.
- Worked with **Go, PostgreSQL**, and message queues under mentor guidance.
- Assisted in API development, bug fixing, and backend improvements.
- Gained hands-on experience with clean code practices and teamwork.

LEARNING & PRACTICE

Frontend Self-Learning

(2021 – 2023)

- Learned frontend fundamentals: **HTML, CSS, JavaScript**.
- Built practice projects using **React.js and Next.js**.
- No commercial or company work during this period.

PROJECTS

Career.edu.uz – Jobs & Career Platform

https://career.edu.uz

- Career platform with jobs, internships, freelance, and courses.
- Go backend, REST APIs, authentication, and AI integrations.

LucidELD – Fleet Tracking Platform

https://www.lucideld.com

- Fleet and ELD management system.
- Backend work on location tracking, trip management, and IFTA modules.

Nomakler – Real Estate Platform

https://nomakler.uz

- Real estate backend platform built with Go.
- PostgreSQL-based services and Redis caching.

SpekLiveGo – Real-Time Conversation Backend

Swagger API:
http://194.163.184.94:8080/swagger/index.html

- Go-based real-time conversation backend service.
- REST API documented with Swagger.
- Deployed for live testing and API usage.

PDFNinja – PDF Tools (Backend API)

GitHub Repository:
https://github.com/infosec554/pdfninja

- Go-based **PDF processing backend service**.
- Supports **15 core PDF operations**, including:
    - PDF to Word conversion
    - PDF to Image conversion
    - Merge PDF files
    - Split PDF files
    - PDF compression
    - PDF metadata handling
- Exposes a **RESTful API** with complete **Swagger documentation**.
- **Dockerized** service with **Redis caching** to improve performance and scalability.

SKILLS

- Tech Stack

Core: Go (Golang), Kafka, REST, gRPC,webRtc
(vidio ,audio ,piono),websocket
Databases: PostgreSQL, Cassandra, Redis
Infrastructure: Docker, Docker Compose
Cloud: AWS (EC2, RDS, S3, ElastiCache), CI/CD pipelines

Additional: Node.js (Express), Git,Gitlab

Integrations

Speech & Language: Whisper, Azure Cognitive Services,
LanguageTool ,courseseria
Payments: Stripe, PayPal
Auth & Security: OAuth2, JWT, API keys
Messaging/Queueing: Kafka, RabbitMQ
Tools: Swagger/OpenAPI, Postman, Kafka UI

Platforms & Systems Experience

- Coursera (course-related integrations / platforms)
- HEMIS (education management system)
- DMSP (document / data management system)

Bachelor of Science in Software Engineering — Tashkent University of Information Technologies (TUIT) Aug 2019 – May 2023 | GPA: 4.2/5

LANGUAGES

- English: B1
- Uzbek: Native
